Alphen aan den Rijn, August 19, 2002

Ref: G30819M0

Subject: Letter of recommendation

To Whom It May Concern:

This is to describe the relationship between Koolhaas Alphen BV and the Daedalus Aviation Group with regards to the execution of the Indonesian Air Force Falcon-Up program on 10 each F16 A/B aircraft.

The program was executed on-site between October 2000 and March 2002 and was completed within the scheduled contract period.

Daedalus was responsible for the engineering, local project management, transfer of technology including training of Indonesian Air Force Technicians and technical execution including provisioning of skilled labour for the complete program while our company, as main contractor was responsible for the overall contract management, logistics and material & tooling provisions.

This set-up and cooperation appeared to be very satisfactory and cost efficient for all parties involved and we from Koolhaas are looking forward to continue to work with Daedalus on future projects.

Koolhaas Alphen BV

Koos Pullen,
Managing Director
